Steven Li

Software Engineer

New York City, NY, USA (929) 263-9567 listeven6691@gmail.com www.linkedin.com/in/stevenli44 https://enbattle.github.io

EXPERIENCE:

Accenture

Full Stack Senior Engineer *March 2024 - Present*

New York City, NY, USA

- Lead a team of engineers to develop and deploy an AI gamification learning engine scaled to over 1000+ internal users across seminars and instructor-led courses, enabling seamless API integration with existing training platforms
- Manage a team of engineers to enhance an enterprise-scale event tracking system that monitors 30+ critical applications with logging and observability, identifying customer experience bottlenecks in real-time by more than 25%
- Developed the standard framework for a context-engineering knowledge workspace with custom MCP server, and reusable agent workflows and skills for over 20+ different teams and workstreams
- Teach software engineering as Senior Instructor for AI and full stack engineering technologies to over 200+ students and provided onboarding and mentoring to 30+ instructors in the engineering program

Back-end Senior Engineer *May 2023 – March 2024*

New York City, NY, USA

- Enhanced e-commerce presence for a major brand by developing and deploying 50+ production-ready APIs with comprehensive testing and documentation with seamless integration to the existing platform

Front-end Engineer *July 2021 – May 2023*

New York City, NY, USA

- Modernized a desktop application for an investment firm, increasing service delivery speed by 40% while implementing robust SDK integration for streamlined authentication and efficient searching with intuitive navigation
- Developed comparative proof-of-concept applications using Glue42 and Openfin, conducting performance benchmarking across scalability, reliability, and cost metrics that enabled client to make data-driven vendor selection, resulting in significant annual savings on technology contracts

Crestron Electronics | Software Engineering Intern *January 2020 – June 2020*

Rockleigh, NJ, USA

- Developed efficient smart home drivers in C# for the latest audiovisual systems, TVs, and security systems integrated with Crestron's control platforms
- Examined codebase quality using the company's Java/C# framework and supported the security test environment
- Collaborated with quality engineering teams on regression testing and analysis for smart home drivers and control systems pre-release

SKILLS:

- **Full Stack Development**: Typescript, React, Next.js, Angular, Node.js, Python, Java, SQL, PostgreSQL, GraphQL, MongoDB, CosmosDB, DynamoDB
- **AI**: LLM API Integration, RAG, Agentic Workflows & Multi-agent Orchestration, custom MCP server development, AI Coding Agent Tooling (custom subagents, hooks, guardrails)
- **Mobile Development**: Expo, React Native, Flutter
- **Cloud Platforms**: Microsoft Azure, Amazon Web Services, Supabase

EDUCATION:

Rensselaer Polytechnic Institute, Troy, NY *May 2021*

Bachelor of Science (BS) in Computer Science

Bachelor of Science (BS) in Information Technology & Web Science
